

S5 Appendix

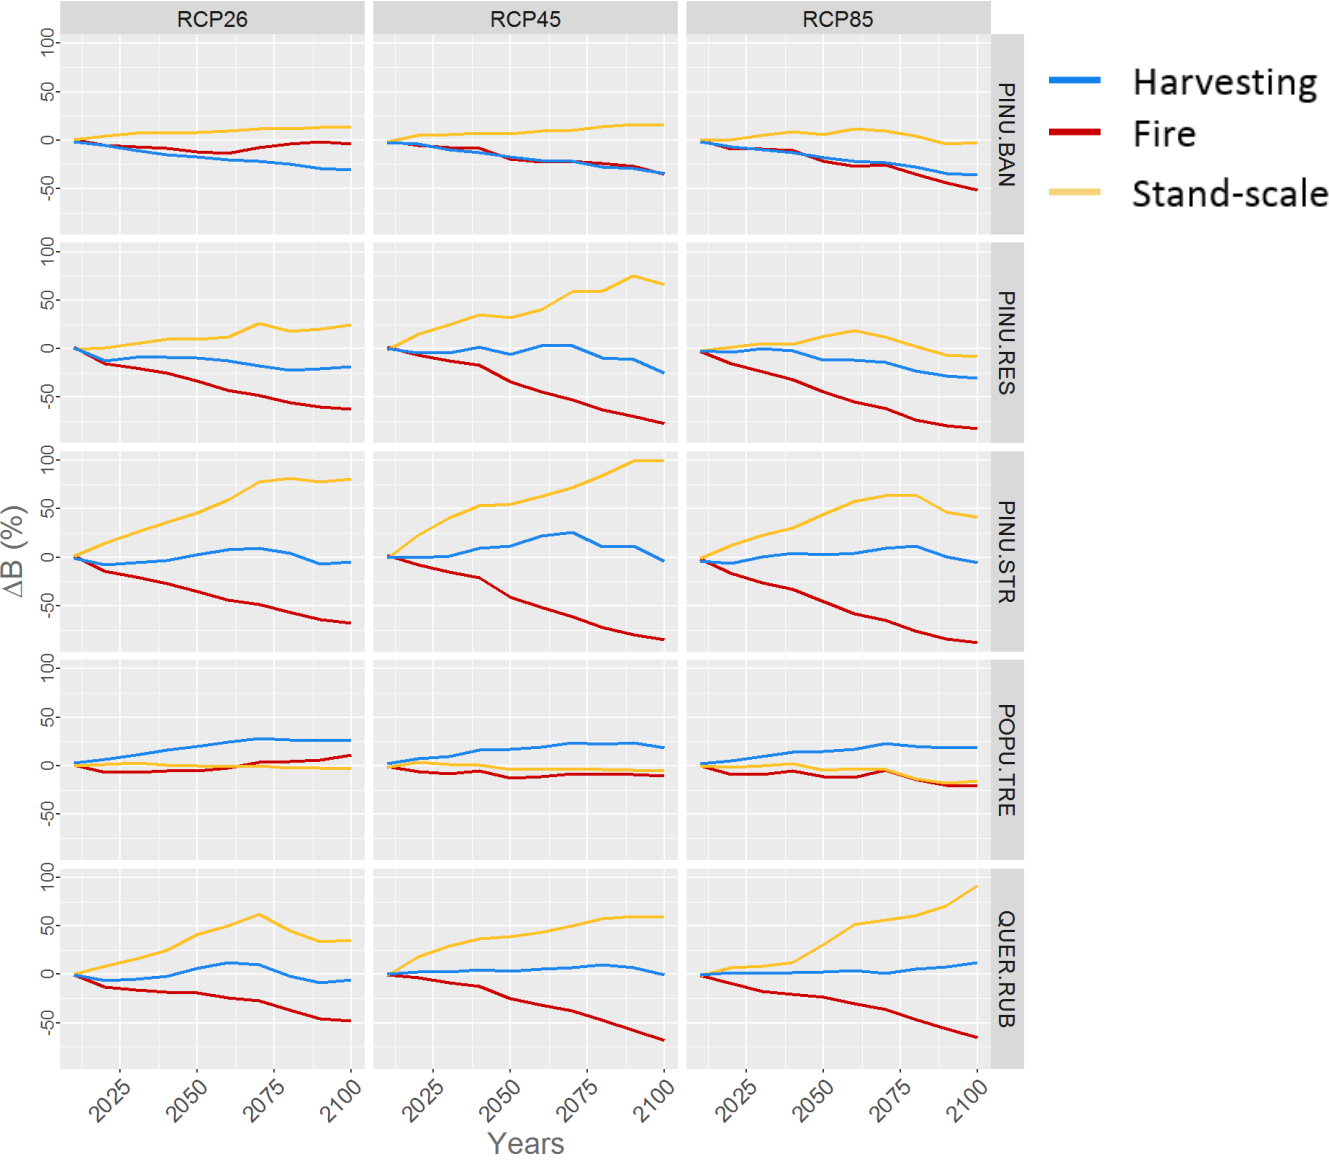

Trends in species-specific mean biomass differences (ΔB)

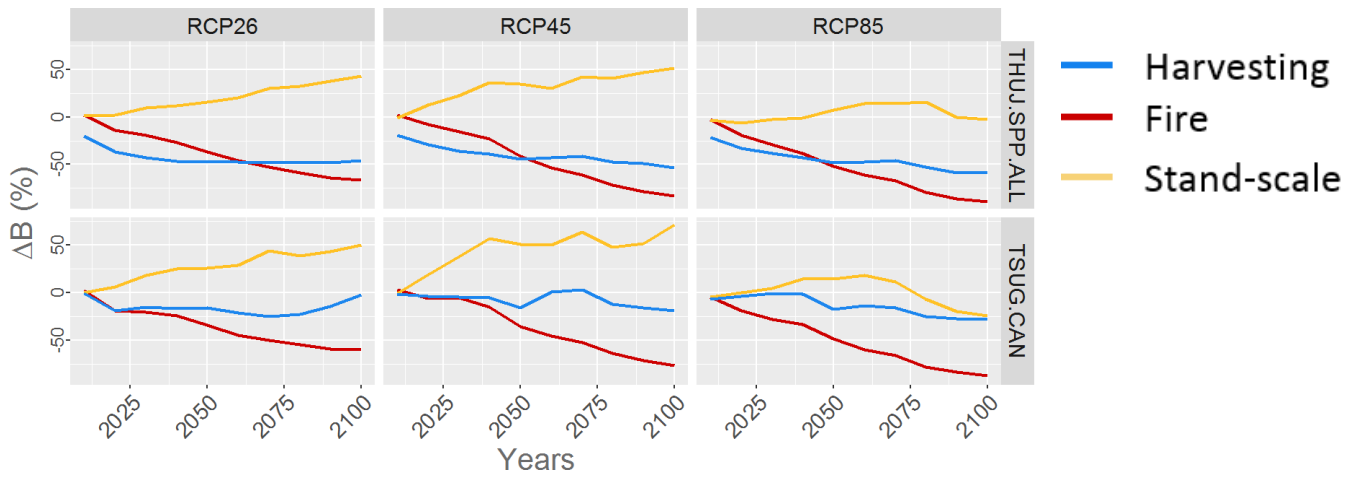

(continued...)

(continued...)

(continued...)

S5.1 Fig. Trends in species-specific mean biomass differences (ΔB) between the reduced and the full model for each of the mechanism of change considered (either climate-induced changes in fire, in stand-scale processes as well as harvest) under RCP 2.6, RCP 4.5 or RCP 8.5 forcing scenarios. See Table 1 for species abbreviations.
